Memo 4C-1/146

DATE: May 29, 1984

FROM: V. McLane VM   BNL - USA

SUBJECT: Unobtainable data

I would like to propose the use of the EXFOR data line in CINDA to document unobtainable data without having to make an EXFOR entry for the data. In this case, the EXFOR number would be coded as 0.

Example:

AL27NG ORL7796E1.0+3.6.0+34EXFOR00000. 8403.Data unavailable

This would not eliminate the use of the 'UNOBT' EXFOR data set, which could still be used at the compiler's discretion.

Sol Pearlstein
