

MEMORANDUM 4C-2/65

Date : 29th September, 1975  
From : A. Schofield  
Subject : Remarks on TRANS 2020

GENERAL REMARKS

We are sorry about 75 KIEV,,, but we were unable to find out page or paper numbers corresponding to compiled works.

The following features are due to homogeneous treatment of input data throughout the work (or table in the case of 20434.003) in the new compilation scheme. As far as I can see they don't conflict with established rules. If they happen to cause inconvenience in their processing, retransmission will be considered with high priority.

20426.009-019

Constant EN appears in DATA section, not in COMMON.

20430.003-005

Numerical value of -DATA-ERR has a minus sign.

20434.003

Unique gamma-energy appears under E-MIN with blank in E-MAX. This presentation seems self-explanatory, and avoids tricky coding in three columns : E, E-MIN and E-MAX.

*A. Schofield*

Distribution

Dr V. Manokhin (5 copies)  
Dr S. Pearlstein (5 copies)  
Dr J. Schmidt (5 copies)
