

Date: February 4, 1977
 From: Thomas W. Burrows, V. McLane (May)
 Subject: TRANS Tape B002

ENTRY: B0001

Monitor in all subentries refers to the Meghir thesis (1962) in B0016.002; however, ENTRY B0016 is given as a private communication from Meghir and Yaffe.

ENTRY: B0002

We haven't received B0033 mentioned under ADD-RES.
 Also, the authors have a table and curve for the sum of the cross sections for (α, Xn) , where $X=1-8$. Should this have been coded?

SUBENT B0006.007

Milazzo-Colli + did not measure this. This should be a separate entry.

ENTRY B0012

The authors consider the process to be fission and spallation. This combination would give a different distribution than fission only.

ENTRY B0013 and B0014

We have not received B0022 mentioned under MONITOR

SUBENT B0014.016

49-IN-116-M should be 49-IN-116-M1

SUBENT B0015.001

The $11n$ and $p+11n$ reactions should have been included as separate sub-entries to insure retrievability.

SUBENT B0015.002 and B0015.003

Even though these entries have been superseded, there should have been energies in COMMON to insure retrievability. Also, while we have not received B0036 yet, Phys. Rev. C10, 722 (1974) does not mention this article.
