

MEMO CP-C/22

Date: September 15, 1977
From: T.W. Burrows ^{TWB}
Subject: McGowan - Milner Data Files

We are currently in the process of producing an index of the McGowan-Milner data files (7101 data sets), which may be checked and processed by our CPND Bibliography codes. With the aid of the index, we will shortly begin converting the file to EXFOR format. The priorities will be integral CPND, differential, double differential, and polarization. Due to limited manpower, no attempt will be made to provide complete bibliographic information. The priority on this work will be low, but continuing. It is anticipated that the index will be finished by November, 1977, and the conversion of, at least, the integral CPND by May, 1978. Copies of the index and the converted file will be provided on request when they are ready.
