

DAI 1324-0

BROOKHAVEN NATIONAL LABORATORY

MEMORANDUM

CP-C/96

DATE: November 30, 1982
TO: Distribution
FROM: V. McLane *vm*
SUBJECT: Information-Identifier Keyword INC-SOURCE

We do not object to the introduction of the keyword INC-SOURCE. However, introduction of new keywords into Dictionary 2 requires approval of all data centers and should not be done by fiat. Even if it is restricted to charged particle use, all centers must be prepared to process such data.

NDS should submit a formal proposal for the inclusion of this keyword, including manual updates.

Perhaps, since it appears that dictionary 19 will also be used for this keyword, its use verses N-SOURCE should be completely optional.
