Subject: Particle codes PI, PIP, PIN, X in Dictionaries
13, 28, 29 and 33
=====

- 1) EXFOR conclusion 4.3 of the 1983 NRDC Meeting requests the introduction of pion codes PI, PIP, PIN in Dictionaries 28 (incident particles) and 29 (REACTION SF3). Since a particle given in SF3 is also likely to be used in SF7 (particle considered) and with PART-DET, EN-SEC etc., we introduce these codes also in Dictionaries 13 and 33.
- 2) The code X (undefined outgoing particles) is at present, for historical reasons, given in Dictionary 13. Since this code is legal in REACTION SF3 (Process-Dict.30) but not under PART-DET etc. we delete this code from Dict. 13.

As both changes rectify inconsistencies, we assume your approval. Kindly verify whether this affects your EXFOR-check programs.
