Subject: EXFOR TRANS 3053 and D014

1. The EXFOR TRANS tapes 3053 and D014 contain retransmissions due to the revised country codes, i.e. CPR for the People's Republic of China and JPN for Japan. Note that tape D014 contains entries with accession-numbers starting with B and P. We believe that the previous country codes have now been removed from the EXFOR files.
2. Tape TRANS 3053 contains, among others, revised neutron emission data from Dresden, GDR. As the previous version of these data had been used by evaluators, we ask the centers to bring the revised data to the attention of evaluators.
