To: Distribution

From: O. Schwerer *O. Schwerer*

Subject: Dictionary updates requested in Memo CP-C/138 and related actions

Additions to Dictionary 36:

SEQ,DA: This proposed code is quoted as occurring in an 'Area 3 Entry'. As we cannot find this code in an area 3 entry, we would like to know the entry-number in order to trace down the possible mistake.

The code SEQ,DA cannot be introduced. Using SEQ implies more than 1 outgoing particle which, for angular distributions, requires coding of a 'particle considered' in SF7. In our search we found 1 entry of Area 2:

Subentry 20937.009 (N,A+N)...,SEQ,DA which should be corrected to SEQ,DA,A (Retransmission requested from NEA-DB).

We also found an entry in Area 3 with SEQ/PAR,DA (subentry 30593.016) which we will change to SEQ/PAR,DA,N both in the entry and in Dictionary 36.

PAR,POL,,ASY: we introduce PAR,POL/DA,,ASY instead to be consistent with existing codes and LEXFOR.

Clearance: *J.J. Schmidt* /.

Deletions from Dictionary 36:

In our version of Dictionary 36 the codes "already in Dictionary" PRE,KE/DA,FF and TER,KE/DA,A do not exist.

Dictionary 27:

21-SC-50 has an isomer of 0.35 s. We will change the isomer flag to 'A' according to the Manual.
