From: H.D. Lemmel *Lemmel*Subject: Arrangements and schedule for the 8th NRDC Meeting
Saclay, 9-11 October 1985

The Local Secretary at the NEA Data Bank will be Bernd Neumann.

For your hotel reservations, a hotel in Paris in the 8th or 16th district (arrondissement) would be preferable, or in Versailles.

The meeting will take place at the NEA Data Bank in Saclay, and transportation between Paris and Saclay will be provided. If you do not arrange your hotel reservation yourself, request assistance from Bernd Neumann as early as possible. In any case it is essential that you inform Bernd Neumann where you stay, so that he can arrange for the transportation.

As usual, kindly submit in writing a status report on the activities of your Center.

Proposals for discussion at the meeting should possibly be distributed by CP-Memos in advance.

As the new ENDF-6 format will be capable to include evaluated charged-particle reaction data, I would suggest that NNDC prepares a presentation of this new feature for the CPND centers. Of course, the neutron data centers are also interested to hear about the progress of ENDF-6 implementation.

A proposed list of agenda items is attached. The items are not necessarily in the actual sequence of discussion. It seems possible that Joe Schmidt cannot be present on the first day of the meeting, so that I would propose to adjust the sequence accordingly (i.e. to start with more technical matters where his presence may be less important).

I am looking forward to seeing you all at the meeting.

Clearance: J.J. Schmidt
