

Memo CP-D/234

16 November 1992

To: Distribution

From: O. Schwerer *O. Schwerer*

Subject: Comments on TRANS A027 and R007

Please find attached our comments on TRANS A027 and R007.

TRANS R007 contains four entries which are, in fact, all retransmissions from TRANS R006. However, there are no alteration flags in col. 80 and the original HISTORY entries were replaced by new ones so that they appear like new compilations. We are sending a separate note to RIKEN explaining how retransmissions should be handled.

Distribution:

C.L. Dunford, NNDC
N. Tubbs, NEA-DB
V.N. Manokhin, CJD

Comments on TRANS A027

Entry A0366: *)

Old subentries 64-115 not present because the whole entry was rearranged into only 63 subentries now. This is okay but requires NOSUBENT records for subentries 64-115. Otherwise the redundant subentries 64-115 will not be deleted from our master files.

Also, such a rearrangement - "deletion by combining" of subentries - must be entered under HISTORY. In this case, under HISTORY only "according to memo CP-D/195" is mentioned (although the deletion of the subentries was not even proposed in that memo.)

A0500.003 line 73:

delete '1' from col. 12

A0497.008: *)

REACTION SF6 should probably be TTY like in the other subentries (or change units)

A0497.001, A0498.001, A0499.001, A0500.001:

COMMENT should go under ERR-ANALYS.

A0507.002-005:

RAD-DET not needed in this case because radiation detected is obvious from DECAY-DATA.

Comments on R007

R0038.004 } reaction must be ... (D,N+A) ...
.006 }

R0039.011 line 12 (DECAY-DATA):
3 commas required between XR and DG

*) Retransmission requested
