Convert	ENDF Data to Standard FORTRAN, C and C++ Format.	En
Voraion		En
Version	2014-1 Feb. 2014 * Initial version.	En
	2014-2 Oct. 2014 * Changed from D to E exponential form to improve compatibility between	En En
	computer languages.	En
	2015-1 Jan. 2015 * General updates for release with	En
	PREPRO2015.	En
	* Changed ENDF data filenames from ENDF2C	
	to ENDFB, to agree with PREPRO default definitions.	En En
	* Added code name (to be compatible	En
	with PREPRO output), but NOT TIME (to	En
	keep this code as computer independent	En
	as possible).	Er. Er.
Purpose		En
	de is designed for,	Er
	Data in any ENDF format = ENDF-1 through ENDF-6. ny type of computer = 32 or 64 bit system/compiler	En En
2, UI d	WY CYPE OF COMPUTER - 25 OF 04 DIE SASTEM/COMPITER	En
	de tries to keep things as simple as possible	En
, -	e are NO INPUT PARAMETERS.	En
	eads an ENDF formatted file named ENDFB.IN rites an ENDF formatted file named ENDFB.OUT	En En
	rites a report file named ENDFB.001	En
