Energy-Balance Check

Graph showing the relationship between Energy (eV) on the x-axis and Heating (eV-barns) on the y-axis. The graph includes the following lines:

- Dotted line labeled 'Upper limit'
- Solid line labeled 'Energy-balance heating'
- Dashed line labeled 'Lower limit'

The energy range is from 0 to 200 eV, and the heating range is from 0 to 60 eV-barns.
