Memo CP-N/150

Date: April 8, 2019
To: Distribution
From: M. Fleming, M. Mikhailukova
Email: exfor@oecd-nea.org, michael.fleming@oecd-nea.org
Telephone: +33 (0) 1 45 24 10 72
Subject: Reply to memo 4C-3/401 Articles cited by Mughabghab
 (Action to NNDC, NEA and CJD)

In response to the memo 4C-3/401 (rev.) and action A31 agreed at the 2018 NRDC meeting (see INDC(NDS)-0762):

A31 Fleming Pritychenko (Continuing action) Perform EXFOR completeness checking for the list of articles (4C-3/401, articles cited in S. Mughabghab's "Atlas of Neutron Resonances") to identify articles missing in EXFOR, and assign responsibility of compilation of the identified articles to centres by a memo.

the responsible center has been defined for articles from the Mughabghab *Atlas of Neutron Resonances*, which are absent in EXFOR, or for which some corrections have to be made in EXFOR. Results of this work are summarized in 2 tables within the annex to this memo.

The list of references for NEA DB was checked and responsibility of compilation was defined (see columns *Lab(exp)* and *Center*). The table was split into 4 sections according to the responsibility of the four centers: NNDC (1), NEA DB (2), NDS (3) and CJD (4). CINDA also was checked and the result is given in the column *CINDA* with an explanation of abbreviations provided under the title of Table 1.

Then EXFOR numbers were defined for area 2 (NEA DB) and area 4 as shown in the column *EXFOR#*. Four cases were identified:

- Entry # provided: Cases where the number is provided are those where the article is included in this Entry # but some correction could be made, as explained in the Comment/Action column. These comments are for the feedback web-site.
- For #: This article should be compiled in the existing, identified entry.
- New: It is proposed that these data should be included in a new EXFOR entry.
- New if for EXFOR: These articles may be the subject of a new EXFOR entry if they should be included in EXFOR.

The use of red color in the first four columns indicates a typo present in the data from the original memo 4C-3/401 (rev.). Comments for the feedback list, misprints in the *Atlas*, articles not for EXFOR and articles that require additional discussion to determine suitability for EXFOR are listed in Table 2.
