Memo CP-D/524 (Rev.)

Date: 8 October, 2008
To: Distribution
From: S.Dunaeva, O.Schwerer, N.Otsuka
Subject: **INSTITUTE code and Author's list in EXFOR Entry**
New INSTITUTE code

To exclude additional time of writing hundreds of authors we propose the following, using NTOF as an example:

- 1) If there is a code for the experimental group in dictionary 3, it may be coded the group code under INSTITUTE instead of the set of all institute codes.

For example: for „NTOF collaboration“ can be introduced code: 2ZZZNTF. The „Country“ code 2ZZZ is used for international organisations within the responsibility of area 2, so this is a possibility (even though NTOF is not a real „organisation“).

- 2) If the group code is applied for INSTITUTE, it is not required to put all authors under AUTHOR. In this case, the first authors of all references under REFERENCE are obligatory, and other authors are optional. If some of authors are omitted, ",+" should be coded at the end of the coded information under AUTHOR.

Example:

INSTITUTE (2ZZZCRN,2ZZZNTF)
AUTHOR (S.Dunaeva,ntof)

We propose to add new code to the Dictionary 3:

2ZZZNTF – The nTOF Collaboration

(Collaboration for experiments at the CERN nTOF facility, may be used instead of the set of institute codes if the collaboration name is given in the reference)
