

## Addition of English Translation(Atomnaya Energiya)

(S. Babykina, 2011-03-15)

In order to improve accessibility of Russian publications to non-Russian EXFOR users, addition of English translation is extremely important when it is available. LEXFOR “REFERENCE” also mentions that

“When translations of references exist, these should be included also, for the convenience of users of EXFOR.”

However, a lot of English translation information is still missing in the EXFOR library.

As an attempt to improve this situation, availability of all articles published in “Atomnaya Energiya” (AE) coded in EXFOR REFERENCE has been checked. Originating centre must add English translation under the keyword REFERENCE.
