

Scanning Responsibility of Journals by CJD

(M Mikhaylyukova, 2012-04-09, Memo 4C-4/197)

In NRDC Protocol at present time in

Appendix B: SCANNING RESPONSIBILITY

CJD responsibility is defined as YK journal only.

Really, independent scanning of several Russian journals is made in CJD for neutron-induced data for EXFOR compilation:

Известия РАН Сер.физич. IZV=BAS	Ядерная Физика YF=PAN	Атомная Энергия АЕ=АЕ/Т	ВАНТ Яд. конст. YK	ЖЭТФ Жур.Эксп. и теор.физики ZET=JET	Письма в ЖЭТФ ZEP=JEL	ПТЭ Приборы и Тех-ка Эксп. PTE=IET	ЭЧАЯ Физ.Эл.частиц и Ат.ядра FCY=SJPN	Письма в ЭЧАЯ FCY/L
------------------------------------------	-----------------------------	-------------------------------	-----------------------------	--------------------------------------------------	--------------------------------	------------------------------------------------	------------------------------------------------	------------------------------

(Russian journal abbreviation = English translation abbreviation is given)

IZV and YF are already included in Appendix B of NRDC Protocol:

IZV is of CNPD responsibility,

YF is of CAJaD responsibility.

Proposal: add AE, ZET, ZEP, PTE, FCY, FCY/L for CJD scanning responsibility in Appendix B of NRDC Protocol..
