Contents

- 1 Short History
- 2 GDgraph: A graph digitizing software**
- 3 Summary

GDgraph: A graph digitizing software

Main Features

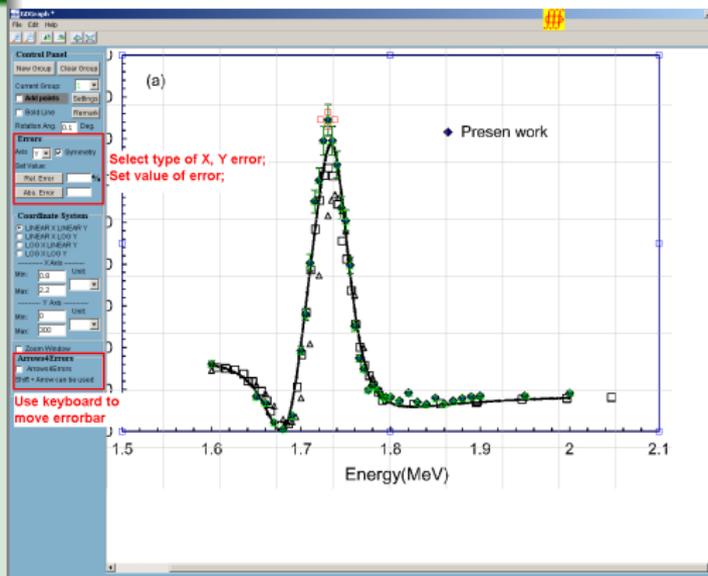

- 1 Update at 2013, Perl
- 2 Chn→Chn&Eng
- 3 GUI: Dialogue → Single Doc. Interface
- 4 Support BMP, JPEG, PNG, GIF ...
- 5 Load or Copy an image from clipboard

GDgraph: A graph digitizing software

Main Features

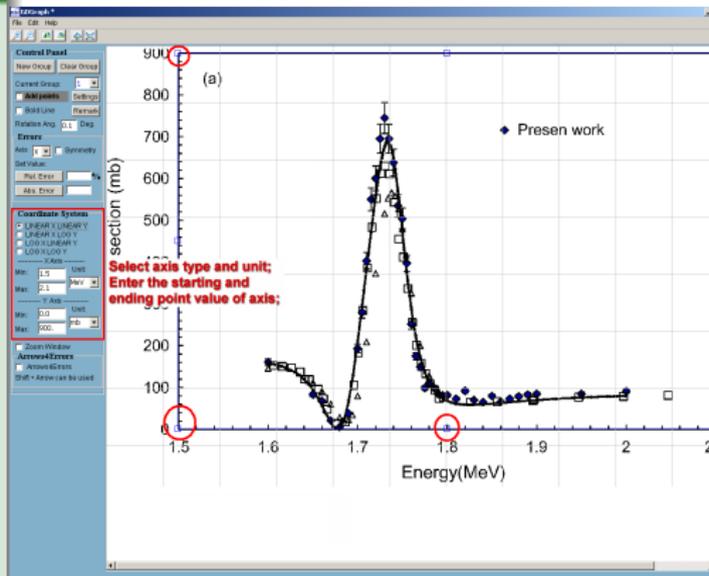

- 6 X,Y error in symmetry & asymmetry
- 7 Set X,Y error in abs. or %
- 8 Set coordinate(type, value, unit)
- 9 Project(*.gdp) & Remarks function
- 10 Setting Function

GDgraph: A graph digitizing software

Main Features

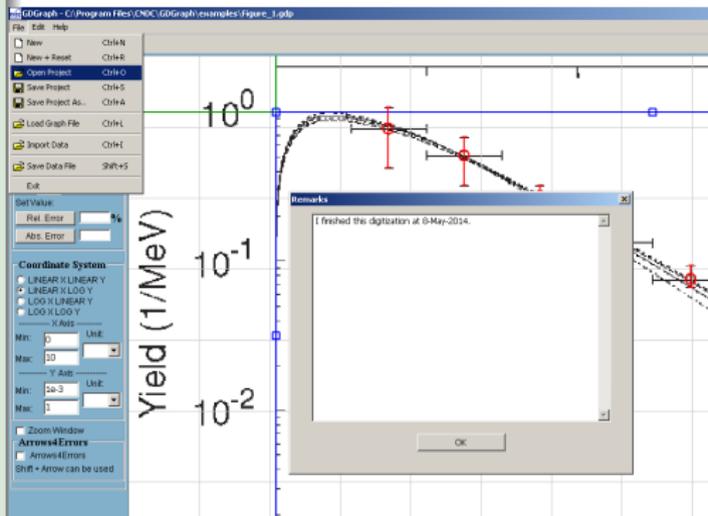

- ⑥ X,Y error in symmetry & asymmetry
- ⑦ Set X,Y error in abs. or %
- ⑧ Set coordinate(type, value, unit)
- ⑨ Project(*.gdp) & Remarks function
- ⑩ Setting Function

GDgraph: A graph digitizing software

Main Features

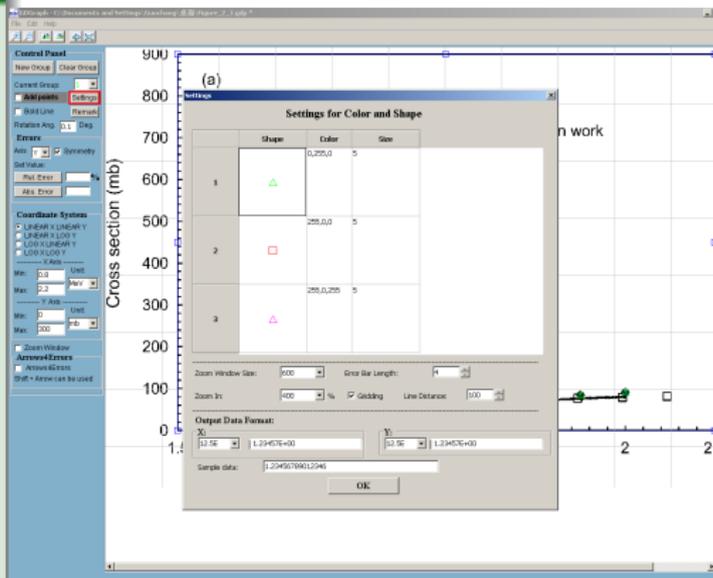

- ⑥ X,Y error in symmetry & asymmetry
- ⑦ Set X,Y error in abs. or %
- ⑧ Set coordinate(type, value, unit)
- ⑨ **Project(*.gdp) & Remarks function**
- ⑩ Setting Function

GDgraph: A graph digitizing software

Main Features

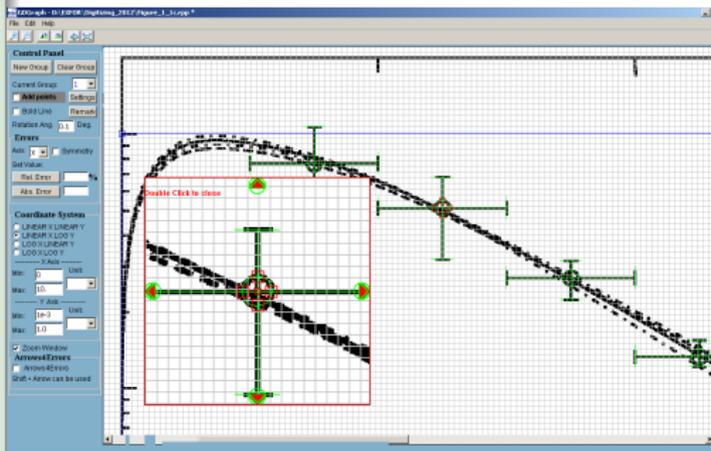

- ⑥ X,Y error in symmetry & asymmetry
- ⑦ Set X,Y error in abs. or %
- ⑧ Set coordinate(type, value, unit)
- ⑨ Project(*.gdp) & Remarks function
- ⑩ **Setting Function**

GDgraph: A graph digitizing software

Main Features

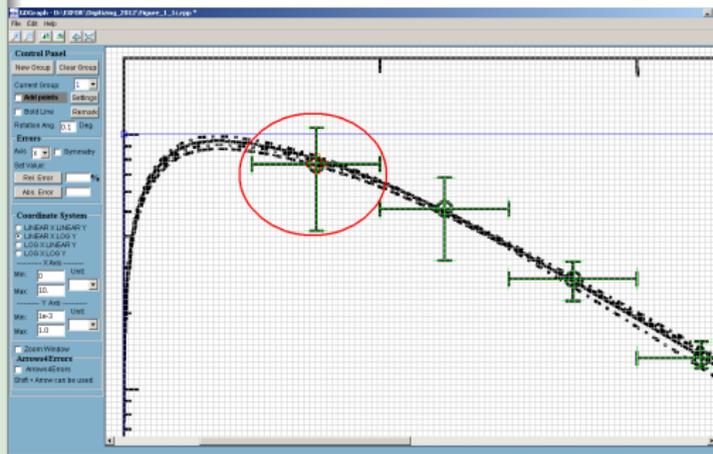

- 11 **Magnifying Glass function**
- 12 Use "Pageup" & "Pagedown" to select Pre. or Next point
- 13 Add shortcut keys to digitize error
- 14 Import Data function

The screenshot displays the GDgraph software interface. A 'Results' dialog box is open, showing a table of data points. The 'Handle Data' window in the background shows a table with columns for Data type, Title, Operate, and numerical values. The 'Results' dialog box has a table with columns for point number and value. The 'Current Group' is set to 1. A red box highlights the value '0.05' in the 'Results' dialog box, and another red box highlights the 'Accept' button.

Point	Value
1	3.06152
2	4.1574555

GDgraph: A graph digitizing software

Setting Function

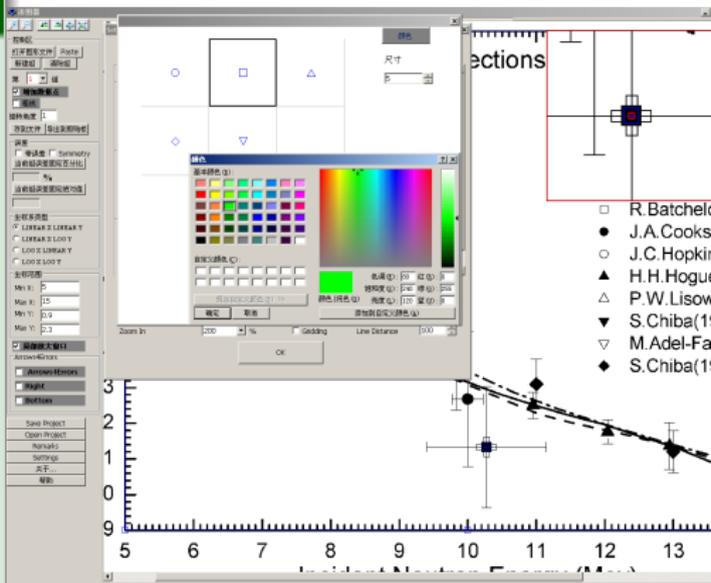

- 1 Point symbol, color, size
- 2 Zoom-in window size
- 3 Multiple of zoom in
- 4 Length of errorbar cross line
- 5 Grid line & space
- 6 Output data format

GDgraph: A graph digitizing software

Setting Function

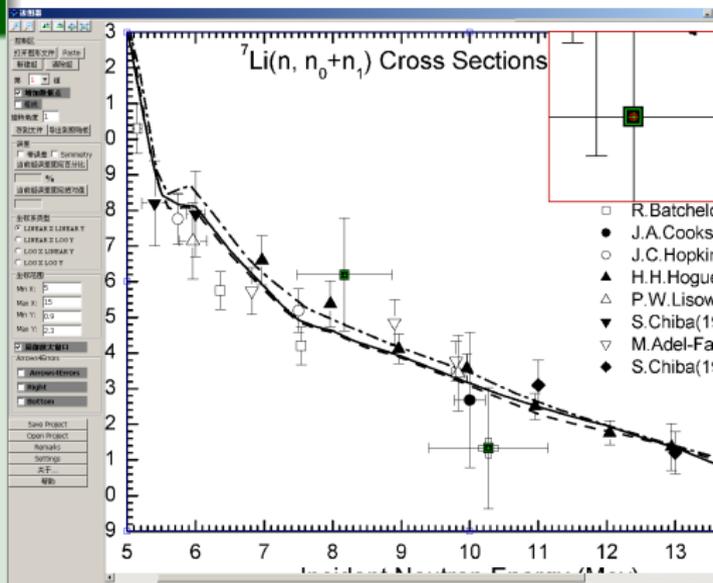

- 1 Point symbol, color, size
- 2 Zoom-in window size

Contents

- 1 Short History
- 2 GDgraph: A graph digitizing software
- 3 Summary**

Summary

- 1 Requirements from evaluation and measurement for developing digitization software
- 2 GDgraph: a software is developed for digitization since 1997
- 3 Present version is fit for digitization requirements
- 4 Some bugs and functions should be developed in future such as symbols, automatic searching axis, ...
- 5 Adopt good characters and functions from other softwares

Thank you for your
attention!

Welcom to China!
