

NRDC Distribution Lists

(N. Otsuka, 2014-12-08, Memo CP-D/859)

Two distribution lists (“memo distribution” and “technical distribution”) are now available on the left bar of the NRDC web page:

Centres are recommended to use the “Memo distribution” list for memo distribution while “technical distribution” for notification of a new tape, comments on a tape, database update etc. Updated lists are appended to this memo. Please let me know when you want to be included or excluded from these lists.

To Microsoft Windows users: Some Microsoft Internet Explorer users may need to use “copy and paste” instead of a click for inclusion of a list to the TO field. Some Microsoft Outlook users may need to activate the option “Commas can be used to separate multiple message recipients” to use these lists effectively.
