

Coding Rule for Volume Number of PTE

(S. Dunaeva, N. Otsuka, 2015-02-19, Memo CP-D/868;

Memo CP-D/868

We found that each issue of Pribory i Tekhnika Eksperimenta (PTE) starts from page 1, and therefore we have to treat the publication year as the volume number as we do for similar journals. We propose the following coding format:

J,PTE,year,(issue),page,year.

The following corrections are proposed.

EXFOR	REFERENCE	should be	Remark
(current)			
40366	J, PTE, 4, 122, 64	J, PTE, 1964, (4), 122, 1964

MEMO 4C-4/209

In memo CP-D/868 it was proposed to code PTE journal references as J,PTE,year,(issue),page,year – use the year as the volume number.

Really, in this journal the volume numbers are absent:

- absent in the hard copies,
- do not mentioned in English translations (Springer) :

Original text published in Pribory I Tekhnika Experimenta,**2011, No.5, pp.50-54**

Compare with PAN:

Original text published in Yadernata Fizika,**2015, Vol.78, Nos 1-2, pp.38-46.**

- absent in web-site <http://elibrary.ru/contents.asp?issueid=928243>

The screenshot shows the eLIBRARY.RU website interface. On the left is a sidebar with various links like 'Поиск в библиотеке', 'Вход в библиотеку', 'Навигатор', etc. The main content area displays the 'ОГЛАВЛЕНИЕ ВЫПУСКА ЖУРНАЛА' (Table of Contents) for the journal 'ПРИБОРЫ И ТЕХНИКА ЭКСПЕРИМЕНТА'. It includes sections for 'Название журнала', 'Издательство', 'Сведения о переименовании и переводе', and 'Год выпуска' (2011). Below this is a table listing articles with columns for 'Название статьи', 'Страницы', and 'Цит.'. Two articles are listed under the heading 'ТЕХНИКА ЯДЕРНОГО ЭКСПЕРИМЕНТА':

Название статьи	Страницы	Цит.
ВЫВОД И КОЛЛИМАЦИЯ ПУЧКА В КОЛЬЦЕВОМ УСКОРИТЕЛЕ У-70 С ПОМОЩЬЮ КРИСТАЛЛИЧЕСКИХ УСТРОЙСТВ	5-11	1

КАЛИБРОВКА ЭЛЕКТРОННО-ОПТИЧЕСКОЙ МОДЕЛИ НАКОПИТЕЛЯ-ОХЛАДИТЕЛЯ ИНЖЕКЦИОННОГО КОМПЛЕКСА ВЗПП-5	12-19	0

On the right side, there's a sidebar titled 'Возможные действия' (Possible actions) with options like 'Выделить все статьи', 'Снять выделение', 'Добавить выделенные статьи в подборку', and 'Новая подборка'. A vertical list of years from 2010 to 2015 is also present.

According to now-day rules the X+ format interpretations of this journal references are for example as:

- # (J, PTE,, (5), 27, 200605) Jour: Pribory i Tekhnika Eksperimenta, Issue.5, p.27 (2006)
- # (J, PTE,, (2), 48, 63) Jour: Pribory i Tekhnika Eksperimenta, Issue.2, p.48 (1963)

These examples look correct - full and complete information is provided to users to find these articles.

Inserting a year as volume number will lead to several disadvantages:

- repetition of year in one REFERENCE looks strange,
- X+ format interpretation will be suspicious (year as volume number),
- Users could be misled by such strange volume number as year,
- Users who use these references to produce bibliographical information, have to delete such strange volume numbers, what is additional work to users, which has to be avoided.

So, I do not see

- any tenable reason to insert a year as volume number in PTE coding,
- any essential advantage of such usage,
- any improvement of EXFOR date base.

Proposals:

- to code PTE references as J,PTE,,(issue),page,year – **without volume number, which does not exists really.**
- respectively, corrections are proposed in REFERENCE and REL-REF lines:
