

### Statistics of checking and finalisation of the preliminary files

The checking of the preliminary Trans files by other Centres is an essential part of the internal NRDC Network quality control. It provides a consistency of the information in EXFOR database and compliance with the latest compilation rules. The numbers of preliminary files submitted since 2016 NRDC meeting for different areas of compilation are presented in Table 1. Both NDS and NEA-DB provided comments for all prelim files on regular bases.

Another performance indicator for the NRDC community is the time interval between the publication of a reference and the availability of the corresponding entry from the EXFOR database. A part of the efforts to reduce the compilation time is to decrease finalisation of the preliminary files after the required 1 month availability for comments. Table 2 contains the dates of the submission for all prelim files, comments and the final Trances. The average time in months between uploading of the preliminary file to the finalisation of the Trans by Centres is the following: **NNDC 3.89; NEA DB 1.91; NDS 1.54; CJD 2.23; JCPRG 2.90; CNPD 1.96; CDFE 1.36; CNDC 1.47**. The centres are recommended to finalize the trances as soon as the required period for comments elapses. In case of disagreement with the proposed corrections the centres shall try to clarify the situation and resolve the issues.
