

## Time Interval between Submission of Preliminary and Final Tapes

(N. Otsuka, 2018-04-17)

EXFOR entries assembled in a preliminary tape are kept in the NDS open area (<http://www-nds.iaea.org/nrdc/ndsx4/trans/>) for one month for reviews by other centres. Currently NEA DB and NDS check every preliminary tape and submit comments (usually within one month).

The originate centre is expected to submit the finalized tape without delay (unless there is a technical issue). This is to provide new data to end users as soon as possible, and also avoid revision of the same EXFOR entries by two compilers in parallel.

Average time interval between preliminary and final transmission is summarized below for each centre submitting tapes.

### Average time interval for each originating centre (“2017” from WP2017-04)

Centre	Duration	2017
JCPRG	113	87
NEA DB	94	57
NNDC	73	117
CJD	63	67
CNPD	41	59
NDS	40	46
CDFE	40	41

### Appendix: Dates of preliminary and final transmission and its interval (days)

NNDC
