Conclusion 43 of the NRDC 2021 meeting (SF3=*+X rather than X+*)

(N. Otsuka, 2022-01-12, Memo CP-D/1036)

This paper seeks an approval on replacement of "X+* and not *+X" with "*+X and not X+*" in the 3rd item of NRDC 2021 C43.

The following sentences were proposed as a conclusion of the NRDC 2021 meeting in Memo CP-D/1015 and accepted without any comment.

C43	(1) A process * followed by fission will be coded by *+F in REACTION SF3 without SEQ in REACTION SF5. (2) A process * following inelastic scattering will be coded by the code of the inelastically scattered particle rather than INL (e.g., N+F instead of INL+F). (3) The process code X will appear in the form of **X+* and not *+X**. See also Memo CP-D/993 (Rev.)=WP2021-34.

The item (3)

> The process code X will appear in the form of X+* and not *+X.

is opposite to what is proposed in WP2021-34, and most probably should read

> The process code X will appear in the form of *+X and not X+*.

The comments registered on the Feedback List follow the revised sentence.

Addition to Memo CP-D/1036:
For example, emission of proton, ^{16}O and anything must be
`(…(9-F-17,P+X)8-O-16,…)`
rather than
`(…(9-F-17,X+P)8-O-16,…).`
