English Translation of the

TABLE OF CONTENTS

OF THE USSR NUCLEAR DATA CENTRE BULLETIN

- VOLUME 6 -

April 1971

IAEA NUCLEAR DATA SECTION, KÄRNTNER RING 11, A-1010 VIENNA

Foreword.

The INDC Secretariat has distributed a limited number of the USSR Nuclear Data Centre Bulletin, Volume 6 (1969), as document INDC(CCP)-12/G.

The enclosed Table of Contents of Bulletin No. 6, translated by the IAEA, is sent to you for your information.

CONTENTSFirst Part

NUCLEAR PHYSICS CONSTANTS

	<u>Page</u>
A.A. Lukyanov, Resonance parameters of fissile nuclei	7
A.A. Bergman, A.E. Samsonov, Yu.Ya. Stavissky, V.A. Tolstikov, V.B. Chelnokov, Radiative capture of neutrons by ^{238}U	32
A.G. Dobchenko, V.I. Ivanov, B.E. Kolesov, V.A. Tolstikov, Radiative capture of neutrons by ^{241}Am	42
L.S. Danelyan, B.V. Efimov, S.K. Sotnikov et al., Study of the spectra of gamma rays produced by the $^{163}\text{Dy}(n, \gamma)^{164}\text{Dy}$ reaction	47
N.O. Bazazyants, V.I. Popov, Elastic scattering of neutrons	50
V.I. Popov, V.I. Trykova, Recommended optical potential parameters and Legendre coefficients for describing the elastic scattering of neutrons in cadmium at 1-15 MeV	99
V.M. Sluchevskaya, Inelastic scattering of neutrons	106
O.A. Salnikov, G.N. Lovchikova, G.V. Kotelnikova, N.I. Fetisov, A.M. Trufanov, Nuclear temperature and inelastic neutron scattering spectra for Cu, Fe, Nb	189
V.I. Popov, V.S. Vnukov, Recommended inelastic scattering values and spectra of inelastically scattered neutrons for ^{238}U	212
V.M. Sluchevskaya, Cross-sections for the (n,2n) reaction	215
I.K. Averyanov, A.E. Savelev, B.M. Dzyuba, Calculations of the cross-section for the elastic and inelastic scattering of 2-6 MeV neutrons by atomic nuclei	236
K.A. Petrzhak, V.F. Teplykh, M.G. Panyan, Mass-spectrometric determination of the relative yields of xenon isotopes in natural uranium fission by 14.7 MeV neutrons	266
B.P. Matsyutenko, R. Ramazanov, M.Z. Tarasko, Changes in the fission fragment yield ratio of delayed neutron precursors in ^{232}Th and ^{235}U fission by 18-21 MeV neutrons	272

Second Part

REACTOR CONSTANTS AND PARAMETERS

	<u>Page</u>
S.M. Zaritsky, Set of programmes for reactor calculations and for processing the results of critical experiments by means of perturbation theory	289
V.I. Popov, A.P. Suvorov, L.S. Tarasko, Multi-group constants for the inelastic scattering of fast neutrons in iron, nickel, stainless steel and lead	296
L.V. Marchenko, Yu.A. Sergeev, Calculation of the square of the slowing-down length for various media in the 18- and 26-group P_1 approximation and comparison with experimental results	319

Third Part

RADIATION SHIELDING CHARACTERISTICS AND PARAMETERS

V.P. Kovalev, V.P. Kharin, V.V. Gordeev, S.P. Filipenok, Angular distributions of bremsstrahlung with an end-point energy of 10-25 MeV from thick targets	393
V.P. Kovalev, V.P. Kharin, V.V. Gordeev, S.P. Filipenok, Angular distribution of photoneutrons in the interaction of 10-25 MeV electrons with metal targets	398
V.K. Daruga, E.S. Matusevich, V.A. Dulin, V.V. Vozyakov, Neutrons from thick targets bombarded with 11.3 MeV protons	402
A.G. Guseinov et al., Allowance for the influence of the resonance structure of differential cross-sections for the elastic scattering of fast neutrons in iron as they pass through shielding	407
E.S. Matusevich, Doses of secondary gamma radiation occurring in radiation shielding due to heavy charged particles	421
B.S. Kondratev, Angular energy distributions of gamma radiation from a plane isotopic source located behind iron barriers	435
