Foreword

The INDC Secretariat receives a number of Soviet reports in Russian as part of the INDC document distribution system. Because of their large number and size most of them cannot be translated by the IAEA. The "Nuclear Physics Research in the USSR - Collected Abstracts" report series and occasional reports of interest to the nuclear data community are translated by the IAEA on a regular basis, and are normally given a "U" distribution.

The "Table of Content Translations" contains the translation of the table of content of those Soviet reports which the IAEA does not translate. These reports are normally available in limited quantities only and are given an INDC "G" distribution.

Table of Content of INDC(CCP)-101/G Nuclear Constants No. 21

- p. 3: Influence of collective effects in level density on the energy dependence of fast neutron radiative capture cross sections
A.I. Blochin, A.V. Ignatiuk, V.P. Platanov, V.A. Tolstikov.
- p. 15: Statistical analysis of neutron cross-sections obtained with filtered beams
Yu.N. Shubin.
- p. 21: "Negative" levels in resonance analysis
V.H. Vinogradov, E.V. Gai, N.S. Rabotnov.
- p. 32: Bayesian approach to the treatment of experimental data
A.V. Van'kov, A.I. Voropaev, M.Z. Tarasko.
- p. 49: Analysis of inelastically scattered neutron spectra
V.I. Pliaskin, V.I. Trykova.
- p. 58: The neutron spectrum emitted from U-238
H.V. Kornilov, V.I. Pliaskin, O.A. Sal'nikov, V.I. Trykova.
- p. 65: The yield of the ^{235}U , ^{238}U and ^{239}Pu (γ, f) reactions well below threshold
Yu.G. Ostapenko, G.N. Smirenkin, A.S. Soldatov, V.E. Zhutchko, Yu.M. Tsipenyuk.
- p. 73: Gamma-radiation from thick targets irradiation by protons and α -particles at intermediate energies
E.S. Matusevich, S.S. Prokhorov.
- p. 106: The evaluation of the neutron radiative capture cross section for gold in the energy range of 1-100 KeV
V.A. Tolstikov, V.S. Shorin.
- p. 126: The effect of the heterogeneity of fast critical assemblies on the reactivity coefficient of materials
V.A. Dulin.
- p. 134: The effect of the use of group constants (and their inherent approximation) on the magnitude of the reactivity coefficients of fast reactor materials
V.A. Dulin

- p. 147: Detailed calculation of the neutron energy spectrum and the problem of group cross section generation
M.F. Vorotyntsov.
- p. 185: Formulation of an algorithm for the calculation of neutron spectra using Evaluated Nuclear Data Libraries
V.V. Vozyakov, V.A. Pivovarov.
- p. 196: On improving the accuracy of breeding and burn-up calculations using reactivity parameters measured on the BN-350 reactor (statistical transference method)
A.A. Van'kov, A.I. Voropaev, V.V. Orlov, L.V. Totchenyi.
- p. 208: Analysis of experiments measuring the Doppler effect in the SEFOR reactor
G.M. Pshakin.
- p. 235: Adjustment of neutronics parameters of homogeneous plutonium-water systems
Yu. Yu. Vasil'ev, V.N. Gurin.
- p. 246: Evaluation of the dependence of the critical mass of highly enriched uranium dioxide on density
A.A. Blyskavka, V.N. Gurin.
- p. 252: Use of the square contributions summation method to evaluate the variance of Monte-Carlo results
D.A. Usikov.
- p. 261: UGRA-A computer program to calculate neutron angular distributions in the multilevel single-channel approximation
N.O. Bazazyants, A.S. Zabrodsкая, M.N. Nikolaev.

- p. 3: The neutron fission cross section of ^{235}U and ^{239}Pu at 2, 24, 55 and 144 KeV
K.D. Zhuravlev, N.I. Kroshkin, L.V. Karin.
- p. 9: Review of experimentally determined prompt neutron spectra from neutron induced fission of ^{235}U
E.A. Seregina, P.P. Dyachenko.
- p. 15: The differential elastic and inelastic scattering cross section for 3.4 MeV neutrons on Mg, Si, Fe and Bi
T. Schweizer, et al.
- p. 21: Gamma-production cross sections for the inelastic interaction of 2.5 MeV neutrons with various nuclei
V.M. Bezotosnyi, et al.
- p. 29: Neutron radiative capture cross sections for ^{115}In , ^{181}Ta , ^{197}Au and for isotopes of Samarium and Europium
V.N. Kononov, et al.
- p. 58: Neutron radiative capture cross section of ^{241}Am measured in the spectra of the BR-5 reactor core
V.I. Ivanov, V.A. Tolstikov.
- p. 67: The effects of multiple scattering of neutrons in the (γ, n) reaction measurements
V.S. Shorin, A.I. Abramov.
- p. 77: The evaluation of the ^{249}Cf fission cross section
V.A. Zherebtsov, E.F. Fomushkin.
- p. 83: The measurement of photofission nuclear data for safeguards
K.H. Ivanov, et al.
- p. 90: Neutron multiplication in a homogeneous natural uranium medium
V.A. Naumov, O.G. Rosin.
- p. 103: Calculation of resonance heterogeneity effects using the Monte Carlo method
V.V. Korobeinikov, M.N. Nikolaev
- p. 119: Dead time of BF_3 and ^3He gas-filled neutron detectors
M. Adib et al.

- p. 3: Average number of prompt neutrons from spontaneous fission of ^{244}Cm , ^{246}Cm and ^{248}Cm
Yu.A. Khokhlov, et al.
- p. 4: The (n,α) , (n,p) , $(n,2n)$ and (n,n') reaction cross section for some isotopes averaged over the fission neutron spectrum
A.K. Brodskaja, et al.
- p. 6: Neutron inelastic scattering on iodine and antimony nuclei
O.A. Sal'nikov, et al.
- p. 10: Angular distribution of inelastically scattered neutrons on carbon
O.A. Sal'nikov, et al.
- p. 14: The spectrum of neutrons scattered from ^{239}Pu at 14.5 MeV
B.V. Devkin, et al.
- p. 20: The theoretical calculation of particle spectra emitted from Nickel due to neutron irradiation
V.M. Bychkov, V.I. Pliaskin.
- p. 28: The evaluation of the total and radiative capture cross sections for natural Chromium
V.M. Bychkov, et al.
- p. 40: The evaluation of the fission and capture cross sections for ^{239}Pu , ^{243}Am and ^{244}Cm
L.P. Abagian, et al.
- p. 80: A translation of the experimental neutron data library (EXFOR) into a computational format
V.M. Bychkov, et al.
- p. 84: The automatized card index of experimental works in neutron physics
V.M. Bychkov, et al.
- p. 87: A retrieval system for nuclear data files presented in a card image format
P. Vertesh.

- p. 102: Neutron Physics Papers Presented at the 3rd All-Union Conference on Neutron Physics, 9-13 June 1975
- p. 102: New giant resonances in nuclei
I.N. Borzov, S.P. Kamerdzhiev
- p. 105: The distribution of fission widths in the double-humped fission barrier model
A.S. Tiapin, V.E. Marshalkin
- p. 113: A measurement of the effective cross-section ratios $\bar{\sigma}_f^5/\sigma_f^8$, $\bar{\sigma}_f^5/\sigma_f^9$, and the effects of heterogeneity effects in fast critical assemblies
A.P. Malykhin, et al.
- p. 115: The (n,nf) reaction and delayed neutrons from ^{233}U
B.P. Maksyutenko, et al.
- p. 119: Measurement of the neutron capture to fission ratio (α) in the resonance region
Yu.V. Rjabov.
- p. 122: The effective moments of inertia of heavy nuclei at low excitations
S.B. Ermagambetov, et al.
- p. 124: A determination of the percent content of a mixture of the fissionable nuclides ^{235}U and ^{239}Pu from delayed neutron yields
B.P. Maksyutenko, et al.
- p. 128: Neutron elastic scattering on ^{208}Pb between 13.4 and 14.8 MeV and isospin dependence of the optical potential
G.E. Belovitskij, et al.
- p. 131: Total photoneutron yields for ^{232}Th and ^{239}Pu (measurement of the total photoneutron cross section of ^{232}Th and ^{239}Pu in the 5 to 20 MeV range at 100 KeV intervals)
G.P. Antropov, et al.
- p. 134: The measurement of gamma quanta production group cross sections for N, O, Al, Fe and Pb with 14 MeV neutrons and their comparison with results from integral experiments
B.I. Sukhanov, P.D. Smotrin.

- p. 136: The characteristics of an intense source of monoenergetic neutrons produced by meson factories
E.I. Dubovoi, V.A. Gol'shkov.
- p. 139: Kinetic parameters of fissionable solutions
M.D. Kamtchibekov.
- p. 142: Measurement of the σ_f^8/σ_f^5 fission cross section ratio in a fast-thermal critical assembly with the activation method
M.B. Bychkov, et al.
- p. 145: The magnetic moment of deformed nuclei in excited states
G.G. Bunatyan.
- p. 147: Allowable calculational approximations in the coupled channel method
B.M. Dzyuba, et al.
