INTERNATIONAL NUCLEAR DATA COMMITTEE

List of
INDSWG- and INDC - documents

The Nuclear Data Unit of the International Atomic Energy Agency distributes documents originated by or for the International Nuclear Data Committee. On the following pages, all documents are listed which have been distributed until November 1967. Many of the documents are still available and can be ordered from the

IAEA Nuclear Data Unit
Kaerntnerring 11
A-1010 Vienna, Austria

IAEA, November 1967

Explanations

Distribution codes:

(as given in INDC/R&C/6, supplemented)

- G Group only; copies for INDC participants and staff connected with the committee operation
- R For members of group as above; others on the list of specialists may request copies, which will generally be supplied by the IAEA or requested from the originators
- U Automatically sent to persons on the named lists but not to be sent to libraries without the author's permission
- L Liaison officers
- D CINDU = Un + data centers + special list
- C CINDA = Un + special list
- U+, R+ as U, R above but may also be sent to libraries

Sub-categories:

- a - IAEA to exercise discretion, following originator's instructions
- n - not to recipients of EANDC documents (prior distribution)
- p - to be published or incorporated in a report for sale or otherwise easily available
- r - reactor physics or other special interest
- s - subject to availability (reprinting not intended); number of available copies is small

Note: Some of the distribution codes mentioned above had to be adapted to the computer, so that the code given in INDC-201 differs from the above list in the following cases:

	<u>INDC-201</u>	<u>INDC-199</u>
	E	= Un
Newsletter:	N	= G + special list

Information for librarians

The documents carry the identifications

INDSWG-1 to INDSWG-137

and INDC-138 etc.

If the documents carry an original identification such as WASH-... or EANDC-..., etc., the INDSWG/INDC-number should be ignored. Often, the INDC-number does not even appear on the document, but the following label appears instead:

This document was distributed by the Nuclear Data Unit of the International Atomic Energy Agency. It has been made available under the auspices of the International Nuclear Data Committee.

KARNTNER RING 11, A-1010 VIENNA, AUSTRIA
TELEPHONE 52 45 11 52 45 25 CABLE INATOM VIENNA TELEX 01-3645

Only in such cases as the documents have only an INDSWG/INDC identification should this be used for classification and reference.
