March 1969

## FOREWORD

This list serves as a basis for the distribution of documents originated by or for the International Nuclear Data Committee, and includes the names of all INDC members, liaison officers and correspondents of the Nuclear Data Unit. The IAEA Nuclear Data Unit tries to maintain this list up-to-date in order to facilitate an efficient interchange of information on nuclear data topics. The recipients of this list are encouraged to inform the Nuclear Data Unit of any corrections, additions and deletions deemed necessary.

Because of the variety of document origins and functions, and the number of countries served by this list, each addressee is assigned a seven-letter distribution code, shown to the left of each name, which indicates the categories of documents he receives. The letters of the distribution code have the following meaning (a zero indicates that the addressee is not included in the particular distribution category).

- U = General distribution for documents originated by the IAEA NDU, the Soviet Union, and other parts of the world, except the U.S., Canada and countries associated with the ENEA. This list includes individuals on the EANDC distribution.
- E = General distribution for documents originated anywhere in the world. This list excludes individuals on the EANDC "U" distribution list, and those who reside in countries associated with the EANDC.
- L = Regional liaison officers of the Nuclear Data Unit.
- G = INDC members and individuals associated with the committee operation.
- C = Recipients of CINDA, the index to the literature on microscopic neutron data.
- D = Recipients of CINDU, the catalogue of numerical neutron data available from the IAEA Nuclear Data Unit.
- N = Recipients of the Nuclear Data Unit Newsletter.

The names appear under three categories, member states, international organizations, and non-member states, and are listed in alphabetical order within each state or organization. The main list is followed by seven shorter lists, indicating the names of individuals in each distribution category, and the total number of individuals in each category.
