International Atomic Energy Agency
Nuclear Data Section
Kärntnerring 11-13
P.O. Box 590
A-1010 Vienna, Austria

November 1969

FOREWORD

This list serves as a basis for the distribution of documents originated by or for the International Nuclear Data Committee, and includes the names of all INDC members, INDC liaison officers, and other recipients of nuclear data information. The INDC Secretariat tries to maintain this list up-to-date in order to facilitate an efficient interchange of information on nuclear data topics. The recipients of this list are encouraged to inform the IAEA Nuclear Data Section of any corrections, additions and deletions deemed necessary.

Because of the variety of documents, and the number of countries served by this list, each addressee is assigned a seven-letter distribution code, shown to the left of each name. This code indicates the categories of documents he receives.

The distribution codes have been separated into two sets. The first set of codes U, E, G and N is designed for documents distribution for the use of the INDC. The second set of documents distribution codes L, C and D is designed for complementary use by the INDC Secretariat. (A zero in the place of a distribution code indicates that the addressee is not included in the particular distribution category.)

Categories of Documents for the Use of the INDC

U = General distribution of technical INDC documents originated by the IAEA, the Soviet Union and other parts of the world, excluding those documents originated by the US, Canada, and countries associated with the EANDC. This distribution list includes individuals on the EANDC distribution list. (Documents which have an EANDC distribution, should never be assigned an INDC/U distribution.)

There are presently 292 names on the INDC/U distribution.

E = General distribution of technical INDC documents originated anywhere in the world. This list excludes individuals on the EANDC distribution list, and those who reside in countries associated with the EANDC. (Documents which have an EANDC distribution, should be given an INDC/E distribution.)

There are presently 105 names on the INDC/E distribution.

- G = Distribution of INDC documents concerning internal Committee matters intended for members of the Committee and other continuing participants of the INDC.

There are presently 18 names on the INDC/G distribution.

- N = Limited distribution of INDC documents concerning the international effort in the field of compilation and dissemination of nuclear data information. This group of recipients consists of Committee members and other continuing participants, Liaison Officers, Local Data Committees, Heads of Data Centres, and the IAEA Secretariat.

There are presently 189 names on the INDC/N distribution.

Categories of Document Recipients for Use of the INDC Secretariat

- L = Regional Liaison Officers of the INDC.

There are presently 22 names on the INDC/L distribution.

- C = Recipients of CINDA, the "Index to the Literature on Microscopic Neutron Data", within the service area of the Nuclear Data Section neutron data centre and the Soviet Union.

There are presently 171 names on the INDC/C distribution.

- D = Recipients of CINDU, the "Catalogue of numerical neutron data available from the IAEA Nuclear Data Section".

There are presently 345 names on the INDC/D distribution.

* * *

The names appear under three categories, member states, international organizations, and non-member states, and are listed in alphabetical order within each state or organization. The main list is followed by seven shorter lists, indicating the names of individuals in each distribution category, and the total number of individuals in each category.

* * *

Notice to INDC Document Originators

Member States and Organizations submitting documents to the INDC are advised to assign an INDC document designator, as described below, and affix it to the upper right-hand corner of the document prior to its distribution.

The INDC Secretariat (IAEA Nuclear Data Section) serves as the distribution centre for INDC documents. It is, however, expected that Member States distribute those documents which they originate to the individuals within their own country. Names of individuals to receive each one of the above described distributions, should be provided periodically by the Member States and Organizations to the Scientific Secretary of the INDC (IAEA Nuclear Data Section). It is also requested that a sufficient number of document copies for the appropriate distribution be provided by the originating state or organization to the INDC Secretariat (IAEA Nuclear Data Section).

The INDC document designator consists of four parts:

1. The "INDC" prefix letters;
2. The origin designator, that is the code of the Member State or Organization which originated the document, in parenthesis, immediately following the prefix. (A list of currently used origin designator codes is given below.)
3. The number of the document, assigned chronologically for each origin series independently;
4. The distribution given to the document, in the form of a letter code. (A list of used distribution codes is given above.)

An example of such an INDC document designator is:

INDC(AUL)-2/G

The presently used origin designator codes are:

AUL	Australia	ISL	Israel
BZL	Brazil	IND	India
CAN	Canada	JAP	Japan
CCP	Union of Soviet Socialist Republics	NDU	Nuclear Data Section
EANDC	European American Nuclear Data Committee	PAK	Pakistan
ENEA	European Nuclear Energy Agency	POL	Poland
EUR	Euratom	SAF	South African Republic
FR	France	SEC	INDC Secretariat
GER	German Federal Republic	TAI	Thailand
IAEA	International Atomic Energy Agency	UK	United Kingdom
		UNI	international origin
		USA	United States of America
		YUG	Yugoslavia
