INTERNATIONAL NUCLEAR DATA COMMITTEE

LIST OF INDC DOCUMENTS

The Nuclear Data Section of the International Atomic Energy Agency receives documents originated by or for the International Nuclear Data Committee for distribution, and single copies of reports for information. This list includes all INDC documents received and distributed between January 1968 and June 1970; it supersedes INDC(SEC)-4/U (distributed November 1969), and is a sequel to the previous list of INDSWG- and INDC-Documents, INDC-199, distributed November 1967. The list of documents received as information copies is given as an appendix to this report. A limited number of INDC documents are still available and can be ordered from the:

IAEA Nuclear Data Section

P.O. Box 590

IAEA, June 1970

INTRODUCTION

This list of documents comprises those documents submitted for and by the INDC between January 1968 and June 1970, and supersedes the earlier list of INDC documents INDC(SEC)-4/U which was published in November 1969.

The distribution codes are separated into two sets (see pages iii and iv), the first set of codes: U, E, G and N is designed for documents distribution for the use of the INDC. The second set of documents distribution codes: L, C, and D is designed for complementary use by the INDC Secretariat.

In addition to the INDC documents received by the INDC Secretariat for distribution, this document also lists the titles of reports received as single copies for information. These documents are not meant to be distributed by the INDC Secretariat, but should be requested from the originating laboratory or organization. All of the single copy documents, which have been received between 30 May 1969 and 19 June 1970, are listed in Appendix A to this document.

## Explanation to the Table

### INDC Document Designator

The INDC document designator consists of four parts:

1. The "INDC" prefix letters;
2. The origin designator, that is the code of the Member State or Organization which originated the document, in parenthesis, immediately following the prefix. (A list of currently used origin designator codes is given below.)
3. The number of the document, assigned chronologically for each origin series independently;
4. The distribution given to the document, in the form of a letter code. (A list of used distribution codes is given below.)

### Date received

This date indicates when the document was received by the INDC Secretariat.

### Original Document Identification

Original document identification, that is, the series and number under which it is normally referred to, or under which it was initially released (e.g. CINDA-67, WASH-1093, etc. ...).

### Document Titles, Authors, other Identification Numbers

Full title of the document, author, corporate author, and all other known identification numbers which have been assigned to the document.

### Accession Number

Chronologically assigned numbers for internal INDC Secretariat use. These numbers are an extension of the sequence used for the INDC-document series until December 1967.

Categories of Documents for the Use of the INDC

U = General distribution of technical INDC documents originated by the IAEA, the Soviet Union and other parts of the world, excluding those documents originated by the US, Canada and countries associated with the EANDC. This distribution list includes individuals on the EANDC distribution list. (Documents which have an EANDC distribution, should never be assigned an INDC/U distribution.)

There are presently 300 names on the INDC/U distribution.

E = General distribution of technical INDC documents originated anywhere in the world. This list excludes individuals on the EANDC distribution list, and those who reside in countries associated with the EANDC. (Documents which have an EANDC distribution, should be given an INDC/E distribution.)

There are presently 111 names on the INDC/E distribution.

G = Distribution of INDC documents concerning internal Committee matters intended for members of the Committee and other continuing participants of the INDC.

There are presently 19 names on the INDC/G distribution.

N = Distribution of INDC documents concerning the international effort in the field of compilation and dissemination of nuclear data information. This group of recipients consists of Committee members and other continuing participants, Liaison Officers, Local Data Committees, Heads of Data Centres, and IAEA personnel.

There are presently 193 names on the INDC/N distribution.

Categories of Document Recipients for Use of the INDC Secretariat

L = Regional Liaison Officers of the INDC.

There are presently 35 names on the INDC/L distribution.

C = Recipients of CINDA, the "Index to the Literature on Microscopic Neutron Data", within the service area of the Nuclear Data Section neutron data centre and the Soviet Union.

There are presently 175 names on the INDC/C distribution.

D = Recipients of CINDU, the "Catalogue of numerical neutron data available from the IAEA Nuclear Data Section".

There are presently 355 names on the INDC/D distribution.

For the complete list of individuals assigned to each of the above distribution codes, please consult the current "INDC Correspondents for the Exchange of Nuclear Data Information", INDC(SEC)-7/U, published April 1970.

Information for librarians

If the documents carry an original identification such as WASH-.. or AERE-.., etc., the INDC-number should be ignored.

Notice to INDC Document Originators

Member States and Organizations submitting documents to the INDC are advised to assign an INDC document designator, as described above, and affix it to the upper right-hand corner of the document prior to its distribution.

The INDC Secretariat (IAEA Nuclear Data Section) serves as the distribution centre for INDC documents. It is, however, expected that Member States distribute those documents which they originate to the individuals within their own country. Names of individuals to receive each one of the above described distributions, should be provided periodically by the Member States and Organizations to the Scientific Secretary of the INDC (IAEA Nuclear Data Section). It is also requested that a sufficient number of document copies for the appropriate distribution be provided by the originating state or organization to the INDC Secretariat (IAEA Nuclear Data Section).
