INTRODUCTION

The Nuclear Data Section of the International Atomic Energy Agency receives documents originated by or for the International Nuclear Data Committee for distribution, and single copies of reports for information. This list includes all INDC documents received and distributed between January 1968 and October 1971, and supersedes INDC(SEC)-16/U. For the first time, because of a newly developed computer sorting and handling programme, this list is produced directly from computer print-out in two sorts: one ordered, as the previous lists, by accession number, and the other ordered by document number within each origin series (e.g. listing all INDC(SEC)- documents in one block). Reference to earlier INDSWG and "interim" INDC reports received between 1962 and 1967 are listed in report INDC/199 (dated November 1967).

A limited number of some of the INDC documents are still available and can be ordered from the:

IAEA Nuclear Data Section
Kaerntnerring 11 - 13
P.O. Box 590
A - 1011 Vienna, Austria.

In addition to the INDC documents received by the INDC Secretariat for distribution, this document also lists the titles of reports received as single copies for information. These documents are not meant to be distributed by the INDC Secretariat, but should be requested from the originating laboratory or organization. All of the single copy documents, which have been received between 12 May and October 1971 are listed in Appendix A to this document.

EXPLANATION TO THE TABLE

INDC Document Designator

The INDC document designator consists of four parts:

1. The "INDC" prefix letters;
2. The origin designator, that is the code of the Member State or Organization which originated the document, in parenthesis, immediately following the prefix. (A list of currently used origin designator codes is given below.)
3. The number of the document, assigned chronologically for each origin series independently;
4. The distribution given to the document, in the form of a letter code. (A list of INDC distribution codes is given below.)

Date of Distribution

This date indicates when the document was distributed by the INDC Secretariat.

Original Document Identification

Original document identification, that is, the series and number under which it is normally referred to, or under which it was initially released (e.g. BARC-474, LA-4095, etc. ...).

Document Titles, Authors, other Identification Numbers

Full title of the document, author, corporate author, and all other known identification numbers which have been assigned to the document.

Accession Number

Chronologically assigned numbers for internal INDC Secretariat use. These numbers are an extension of the sequence used for the INDC-document series until December 1967.

CATEGORIES OF DOCUMENTS FOR THE USE OF THE INDC

INDC documents are presently distributed according to three categories:

G - Distribution of INDC documents concerning internal Committee matters intended for members of the Committee and other continuing participants only.

The number of INDC/G documents needed for distribution is 37.

L - Distribution of INDC documents concerning the international effort in the field of nuclear data. This group of recipients consists of Committee Members and other continuing participants, INDC Liaison Officers, Local Data Committees, Heads of Data Centres, and IAEA Secretariat.

The number of INDC/L documents needed for distribution is 237.

U - General distribution of technical INDC documents. This group of recipients consists of G, L plus additional distribution requested by Member States.

The number of INDC/U documents needed for distribution is 410.

For the complete list of individuals assigned to each of the above distribution codes, please consult the current "INDC Correspondents for the Exchange of Nuclear Data Information", INDC(SEC)-20/U, published November 1971.

NOTICE TO INDC DOCUMENT ORIGINATORS

Member States and Organizations submitting documents to the INDC are advised to assign an INDC document designator, as described below, and affix it to the upper right-hand corner of the document prior to its distribution.

The INDC Secretariat (IAEA Nuclear Data Section) serves as the distribution centre for INDC documents. It is, however, expected that Member States distribute those documents which they originate to the individuals within their own country. Names of individuals to receive each one of the above described distributions, should be provided periodically by the Member States and Organizations to the Scientific Secretary of the INDC (IAEA Nuclear Data Section). It is also requested that a sufficient number of document copies for the appropriate distribution (as indicated above) be provided by the originating state or organization to the INDC Secretariat (IAEA Nuclear Data Section).

*
* *

Note: The INDC distributions include individuals who are in the EANDC distribution area. To avoid duplicate distribution of documents, the INDC Secretariat does not distribute in the EANDC area those INDC documents which originate in the EANDC area. Originators of INDC documents in the EANDC area are therefore advised that the number of documents to be sent to the INDC Secretariat for distribution should be based on the reduced, non-EANDC, distributions.

The number of documents needed for the reduced, non-EANDC, distributions are:

| | |
|-------------------------|-----|
| reduced G distribution: | 18 |
| reduced L distribution: | 98 |
| reduced U distribution: | 180 |

Information for Librarians

If the documents carry an original identification such as BARC-... or AERE-..., etc., the INDC-number should be ignored.
