INDC CORRESPONDENTS

FOR THE EXCHANGE OF NUCLEAR DATA INFORMATION

June 1976

International Atomic Energy Agency
Nuclear Data Section
Kaerntnerring 11-13
P.O. Box 590
A-1011 Vienna, Austria

FOREWORD

This list serves as a basis for the distribution of documents originated by or for the International Nuclear Data Committee, and includes the names of all recipients of INDC documents. The INDC Secretariat tries to maintain this list up-to-date in order to facilitate an efficient interchange of information on nuclear data topics.

The recipients of this list are encouraged to inform the IAEA Nuclear Data Section of any corrections, additions and deletions deemed necessary.

INDC documents are presently distributed according to three categories:

G - Distribution of INDC documents concerning internal Committee matters intended for members of the Committee and other continuing participants only.

The number of INDC/G documents needed for distribution is 34.

L - Distribution of INDC documents concerning the international effort in the field of nuclear data. This group of recipients consists of Committee Members and other continuing participants, INDC Liaison Officers, Local Data Committees, Heads of Data Centres, and IAEA Secretariat.

The number of INDC/L documents needed for distribution is 322.

U - General distribution of technical INDC documents. This group of recipients consists of G, L plus additional distribution requested by member states.

The number of INDC/U documents needed for distribution is 557.

Note: The INDC distributions include individuals who are in the EANDC distribution area. To avoid duplicate distribution of documents, the INDC Secretariat does not distribute in the EANDC area those INDC documents which originate in the EANDC area. Originators of INDC documents in the EANDC area are therefore advised that the number of documents to be sent to the INDC Secretariat for distribution should be based on the reduced, non-EANDC distributions.

The number of documents needed for the reduced, non-EANDC distributions are:

reduced G distribution:	18
reduced L distribution:	204
reduced U distribution:	375

The names appear under two categories, member states, and international organizations, and are listed in alphabetical order within each state or organization. The main list is followed by three shorter lists, indicating the names of individuals in each distribution category, and the total number of individuals in each category.

NOTICE TO INDC DOCUMENT ORIGINATORS

Member States and Organizations submitting documents to the INDC are advised to assign an INDC document designator, as described below, and affix it to the upper right-hand corner of the document prior to its distribution.

The INDC Secretariat (IAEA Nuclear Data Section) serves as the distribution centre for INDC documents. It is, however, expected that Member States distribute those documents which they originate to the individuals within their own country. Names of individuals to receive each one of the above described distributions, should be provided periodically by the Member States and Organizations to the Scientific Secretary of the INDC (IAEA Nuclear Data Section). It is also requested that a sufficient number of document copies for the appropriate distribution (as indicated above) be provided by the originating state or organization to the INDC Secretariat (IAEA Nuclear Data Section).

The INDC document designator consists of four parts:

1. The "INDC" prefix letters.
2. The origin designator, that is the code of the Member State, or Organization which originated the document, in parenthesis, immediately following the prefix. (A list of currently used origin designator codes is given below.)
3. The number of the document, assigned chronologically for each origin series independently (the current number for each series can be obtained from the INDC Secretariat upon request).
4. A letter code, describing the distribution given to the document. (A list of used distribution codes is given above.)

An example of such an INDC document designator is:

INDC(AUL)-2/G

The presently used origin designator codes are:

ARG	Argentina
AUL	Australia
AUS	Austria
BLG	Belgium
BUL	Bulgaria
BZL	Brazil
CAN	Canada
CCP	Union of Soviet Socialist Republics
