FOREWORD

This list of INDC Correspondents, currently existing National Nuclear Data Committees and their memberships is compiled and published upon the request of the International Nuclear Data Committee with the objective to promote the interaction and enhance the awareness of nuclear data activities in IAEA Member States.

It also serves as a basis for the distribution of documents originated by or for the International Nuclear Data Committee and includes the names of all recipients of INDC documents. The INDC Secretariat tries to maintain this list up-to-date in order to facilitate an efficient interchange of information on nuclear data topics.

The report is presented in five sections. In the first section a detailed description of the INDC distribution categories, distribution codes and document designator codes is given. The second section describes the aims, organization and objectives of individual national nuclear data committees. The third section lists names and addresses in alphabetical order within each state or international organization; INDC document distribution code(s), committee membership and/or area of specialization are indicated, where applicable, for each person. This is followed by four shorter lists, indicating the names of individuals in each distribution category, sorted by country or international organization, and the total number of individuals in each category. The final section provides the names of nuclear data committee members also listed by country or international organization.

This publication is issued periodically so as to reflect the formation of new committees as well as changes in the membership of existing committees and to provide a current list of INDC correspondents. In order to keep this file up-to-date, recipients of this compilation are requested to communicate to the IAEA Nuclear Data Section any corrections, additions or deletions as they occur.

INDC DOCUMENT DISTRIBUTION CATEGORIES
AND DOCUMENT DESIGNATOR CODES

INDC documents are presently distributed according to four categories:

- G - Distribution code for INDC documents concerning internal Committee matters intended for members of the Committee and other continuing participants only.

The number of INDC/G documents needed for distribution is: 34

- L - Distribution code for INDC documents concerning the international effort primarily in the field of nuclear reaction data. This group of recipients includes Committee Members and other continuing participants, INDC Liaison Officers, Local Data Committees and Heads of Data Centres.

The number of INDC/L documents needed for distribution is: 431

- N - Distribution code for technical INDC documents concerning the measurement, compilation, evaluation and dissemination of "non-neutron" nuclear data, that is, nuclear reaction (other than neutron) data and nuclear structure and decay data.

The number of INDC/N documents needed for distribution is: 530

- U - General distribution code for technical INDC documents concerned primarily with nuclear reaction data. This group of recipients consists of G, L plus additional distribution requested by Member States.

The number of INDC/U documents needed for distribution is: 599

Note: The INDC distributions include individuals who are in the NEANDC distribution area. To avoid duplicate distribution of documents, the INDC Secretariat does not distribute in the NEANDC area those INDC documents which originate in the NEANDC area. Originators of INDC documents in the NEANDC area are therefore advised that the number of documents to be sent to the INDC Secretariat for distribution should be based on the reduced, non-NEANDC distributions.

The number of documents needed for the reduced, non-NEANDC distributions are:

reduced G distribution: 18
reduced L distribution: 236
reduced U distribution: 314
reduced N distribution: 225

Additional distribution codes are assigned by the INDC Secretariat to distribute reports of special interest to a limited number of people interested in specific technical aspects of nuclear data or in atomic and molecular data. The "special interest" distribution codes currently used for the dissemination of some INDC documents, in addition to the G, L, U and N distribution codes are:

- A - Atomic and Molecular Data for Fusion (selected distribution)
- B - Atomic and Molecular Data for Fusion (general distribution)
- E - Nuclear Structure and Decay Data (limited distribution)
- F - Nuclear Data for Fusion
- H - Transactinium isotope nuclear data
- I - Recipients of reports resulting from the Interregional Project on nuclear data techniques and instrumentation
- J - Recipients of reports concerning neutron data evaluation
- P - Fission product nuclear data
- R - Nuclear data for radiation damage and neutron reactor dosimetry
- V - Recipients of reports concerning the generation, testing, and comparison of multigroup cross-section sets
- X - Charged Particle Nuclear Data (limited distribution)

Any one of the above distribution codes can be combined with the basic G, L, N and U codes, so as to be able to address a specific interest audience (e.g. GHJ).

NOTICE TO INDC DOCUMENT ORIGINATORS

Member States and Organizations submitting documents to the INDC are advised to assign an INDC document designator, as described below, and affix it to the upper right-hand corner of the document prior to its distribution.

The INDC Secretariat (IAEA Nuclear Data Section) serves as the distribution centre for INDC documents. It is, however, expected that Member States distribute those documents which they originate to the individuals within their own country. Names of individuals to receive each one of the above described distributions should be provided periodically by the Member States and Organizations to the Scientific Secretary of the INDC (IAEA Nuclear Data Section). It is also requested that a sufficient number of document copies for the appropriate distribution (as indicated above) be provided by the originating state or organization to the INDC Secretariat (IAEA Nuclear Data Section).

The INDC document designator consists of four parts:

1. The "INDC" prefix letters;
2. The origin designator, that is the code of the Member State or Organization which originated the document, in parenthesis, immediately following the prefix. (A list of currently used origin designator codes is given below).
3. The number of the document, assigned chronologically for each origin series independently (the current number for each series can be obtained from the INDC Secretariat upon request).
4. A letter code, describing the distribution given to the document. (A list of INDC distribution codes is given above).

An example of such an INDC document designator is:

INDC(AUL)-2/G

The presently used origin designator codes are:

NATIONAL NUCLEAR DATA COMMITTEES
ORGANIZATION AND OBJECTIVES

The following Member States have indicated the existence of a nuclear data committee in their countries, the year of the last update is shown in parentheses.

Argentina	(1981)	Mexico	(1980)
Bangladesh	(1978)	Romania	(1984)
Bulgaria	(1981)	Sweden	(1984)
France	(1981)	Thailand	(1984)
German Dem. Rep.	(1983)	USSR	(1978)
Hungary	(1981)	United Kingdom	(1981)
India	(1984)	USA	(1978)
Japan	(1980)	Yugoslavia	(1978)

BANGLADESH

Bangladesh Nuclear Data Committee

The aim and objective of the Committee is to coordinate, compile and evaluate the research activities, both theoretical and experimental, in the field of Nuclear Physics including neutron and reactor physics in Bangladesh.

FRANCE

Nuclear Data Committee of the French Atomic Energy Commission

Objective

The objective of this committee is to maintain a link between measurers, evaluators, and users of nuclear data belonging to different organizations within the CEA. Until now, the committee has been concerned almost exclusively with neutron data, and has had the following functions:

- the establishment and discussion of request lists
- the discussion of experimental programmes and evaluation tasks having the objective of improving coordination and exchanging information on computer programmes (codes)
- the dissemination of information, in particular that provided by the international committees (EANDC and INDC), and the collection of information for these committees.

Organization and Function

The French Nuclear Data Committee, composed of 27 members, represents nuclear data users and nuclear data producers (experimental and theoretical physicists and evaluators) from a number of organizations and centres of the French Atomic Energy Commission.

The Chairman of the Committee (President) is appointed for one year, with a possible extension of his term in office.

The committee meetings, which occur a number of times per year and last for not longer than one day, are called by the chairman, and are assisted by a secretary. The agenda for the meetings are drawn up by the chairman in accordance with the representation of organizations concerned. Depending on the agenda, expert advisers or observers can be invited to participate in the meetings.

In addition to plenary sessions, special working groups meet as required to study certain topics relevant to the work of the Committee.

HUNGARY

Hungarian Nuclear Data Committee

Currently, the Subcommittee for Nuclear Physics of the Hungarian Academy of Sciences serves as the national nuclear data committee. The main objective of this Committee is the coordination of different aspects of research in the field of nuclear physics in Hungary.

JAPAN

Japanese Nuclear Data Committee

The Japanese Nuclear Data Committee (JNDC), organized in February 1963, is a standing committee of the Atomic Energy Society in Japan. The committee is concerned primarily with the activities related to the nuclear data of interest to the development of the nuclear energy programme. As of July 1, 1982, the Committee has presently the following substructures: an executive committee, a counseling committee, three subcommittees on "nuclear data", "reactor constants" and "nuclear structure and decay data", eleven working groups under the subcommittees, and three individual groups for CINDA, WRENDA, and the thermal neutron scattering bibliography.

The Committee meets two times a year, and each substructure group meets two to twelve times a year depending upon the conditions of its activities. The committee meetings and the activities of the working groups are sponsored by the Japan Atomic Energy Research Institute (JAERI), however, all activities of JNDC are largely supported by its members on a voluntary basis. The Nuclear Data Centre or JAERI has been taking charge of the secretariat of JNDC.

ROMANIA

Romanian Nuclear Data Committee

The Romanian Nuclear Data Committee includes physicists who are directly involved in nuclear data measurements, compilation, evaluation and/or use of such data, for fission and fusion reactors as well as other applications.

The role of the Romanian Nuclear Data Committee is:

1. To stimulate the experimental measurements of neutron nuclear structure and decay data as well as atomic and molecular data.
2. To stimulate evaluations of neutron nuclear data for fission and fusion reactors.
3. To disseminate the experimental and evaluated nuclear data compiled in computerized libraries and supplied by the IAEA-NDS.
4. To maintain a link between measurers, evaluators and users of nuclear data from Romania.
5. To act as the formal link with other national data committees and with the INDC-IAEA.
6. To produce an annual progress report on nuclear data activities in Romania for presentation to the General Director of the Central Institute of Physics, Bucharest and to the International Nuclear Data Committee, IAEA, Vienna.

SWEDEN

Swedish Nuclear Data Committee (KDK)

The committee members represent on one hand users of nuclear data within the reactor, shielding, fusion, medical and biological fields from reactor industries, national institutions and universities, and on the other hand nuclear physicists from national institutions and universities. The Committee meets twice a year to discuss questions concerning information and coordination of works and international cooperation in the nuclear data field. The Committee publishes reports about nuclear data activities in Sweden and compiles lists of nuclear data needs.

The annual nuclear data activity report and the relation between data needs and measurements are discussed in a subgroup of the Committee, the Coordination Group on Measurements. The Group also represents a link for nuclear data information exchange between the Committee and nuclear physics institutions at the Universities.

USSR

USSR Nuclear Data Commission

Organization and Objectives of the Soviet Commission on Nuclear Data of the State Committee on Atomic Energy Utilization

(Text of report given at the 6th Meeting in Vienna, 8-12 October 1973)

The Commission on Nuclear Data (K.Ya.D) was formed in 1969 for the purpose of coordinating the activities regarding the need, the measurement, the compilation and evaluation of nuclear data, as well as for establishing international cooperation in the field of nuclear data.

The Commission is composed of leading experts in the field of nuclear data representing a number of institutes. The chairman of the Commission is Professor V.A. Kuznetsov of the Institute of Physics and Energetics (FEI). The organization responsible to the Commission for the conduct of nuclear data activities is the Nuclear Data Centre (CJD) at Obninsk. The commission meets a few times every year at which time recommendations are considered in context of plans for nuclear data projects. Until recently, two coordinating groups, which had a broader representation of institutes, were attached to the commission. One coordinating group was responsible for the utilization of nuclear data for reactors and shielding, the other was concerned with measurements and evaluation. These two groups were primarily concerned with neutron data needed for fission reactors and shielding, as well as for fusion reactors. Recently a third group on non-neutron nuclear data has been organized. The organization responsible to this coordinating group is the non-neutron data centre located at the Kurchatov Institute of Atomic Energy. The initial task of this activity consists in the determination of various needs of nuclear data.

At the present time, the coordinating group on measurements and evaluation is composed of subject-oriented sub-groups each responsible for a specific activity. Eight such sub-groups have been established and are responsible for the following subjects:

1. σ_t , v , kinetic energy of fission fragments and methods for the absolute measurements of fission parameters
2. (n,n') , $(n,2n)$, and neutron fission spectra
3. " α " of fissionable isotopes and $(n,2n)$ reactions
4. Total cross-sections
5. Cross-sections of highly radioactive nuclides
6. Capture gamma-ray spectra from (n,γ) and (n,p) reactions
7. Standard and reference cross-sections
8. Thermonuclear (synthesis) reactions

The responsibilities of the subject-oriented sub-groups consist of the review of data requests, the promotion of data evaluation and the feeding of the numerical data to the Nuclear Data Centre (CJD).

UNITED KINGDOM

Role of the United Kingdom Nuclear Data Committee UKNDC

1. To exercise a co-ordinating role over the U.K. programmes of nuclear data measurement, evaluation and compilation
2. To act as the formal link with international nuclear data committees and data organizations (e.g. INDC, NEANDC, NEACRP, CCDN)
3. To act as the formal link with other national committees with nuclear data interests
4. To receive reports from sub-committees
5. To ensure that there is satisfactory interaction between subcommittees
6. To identify new areas requiring nuclear data and to encourage provision of the appropriate support for each area
7. To produce U.K. requests lists on appropriate topics
8. To act as a centre of information about the U.K. work on nuclear data
9. To produce an annual progress report on nuclear data activities in the U.K. for presentation to the Director of Harwell and to the relevant international data committees.

Role of the Sub-Committees of the UKNDC

1. To review (or take note of) the nuclear data needs and formulate the requirements in their appropriate areas
2. To stimulate the fulfilment of data needs
3. To review progress on meeting the requirements in (a) experimental measurement or theoretical calculation of data, (b) evaluation and (c) compilation
4. To act as centres of information within the U.K. for dissemination of new information
5. To arrange suitable fora for discussion of relevant topics
6. To report to the main committee at regular intervals.

UNITED STATES

US DOE Nuclear Data Committee

The Nuclear Data Committee (DOE-NDC) was established by the Division of Physical Research (DPR) in 1975 to provide it with assistance and guidance in nuclear data matters. The Committee is to focus principally on applied nuclear data activities, especially on those pertaining to nuclear energy. The Committee is to be concerned with broad overviews of the field as well as to provide evaluation of major nuclear data programmes at the request of DPR. Detailed technical discussions are to be carried out within the Cross Section Evaluation Working Group (CSEWG) or within other working groups under the National Nuclear Data Centre (NNDC). DOE-NDC is to be the principal national committee to interface with the international nuclear data committees of IAEA and NEA. Meetings of DOE-NDC will be held annually and are chaired by a DOE employee. Members are appointed by the DPR and serve two year terms.

YUGOSLAVIA

National Nuclear Data Committee

The interim Yugoslav nuclear data committee is composed presently of the chairman of the nuclear sciences departments of the main research institutes, and the INDC Liaison Officer for Yugoslavia.
