INTRODUCTION

The reports which follow were presented to the AEC Nuclear Cross Sections Advisory Group for consideration at the meeting on October 13 - 14, 1965 at Duke University, Durham, North Carolina. These reports contain an informal statement of recent development, changes of emphasis, and preliminary data which are of importance to the cross section measurement program of the AEC. They are not intended to be complete and formal reports, nor do they cover all of the work of the laboratories relating to nuclear cross section measurements.

The data which appear in this report must not be quoted in publications without the express permission of the experimenter. Persons who might make use of these data for serious computations should contact the experimenter directly to verify the numbers.
